

Environment Month Activities in the Daigas Group

May 30, 2019

Osaka Gas Co., Ltd.

Osaka Gas Co., Ltd. (President: Takehiro Honjo) pursues ESG-friendly corporate management, contributes to the sustainable development of society, and aims at sustainable growth of the Daigas Group.

Especially in the environmental field, we strive to be in harmony with the environment and use energy and other resources efficiently in accordance with the Daigas Group CSR Charter.

June is Environment Month. The Daigas Group will take this opportunity to engage in a wide variety of projects, including the promotion of energy saving and CO2 reduction, and community-based activities for nature conservation.

1. Conservation of energy and other resources and observance of environmental laws and regulations

Through EMS activities and the Cool Biz campaign, we will promote energy saving at Daigas Group offices and continue the cooking oil recycling project we started at the Osaka Gas Head Office's cafeteria this fiscal year. We will also comprehensively check that our business conforms to environmental laws and regulations.

2. Community-based nature conservation

In green spaces on the premises of our LNG terminals, we grow native plants. To expand their habitats, we will transplant their seedlings to the premises of newly built condominiums developed by our group company. We will also invite local elementary school students to tree-planting experiences at the green spaces on the premises of our LNG terminals.

3. Enlightenment and cleanup in collaboration with local communities

We will actively collaborate on environmental events with local communities and think about environmental activities with customers. Also, Daigas Group companies will clean up the areas around their offices and actively join cleanup projects with local residents.

4. Holding an environmental symposium

At the symposium, Daigas Group employees will listen to lectures by experts with a profound knowledge of environmental issues and learn about what long-term changes and issues climate change is expected to bring to energy and environmental policies and markets, and how to cope with these changes and issues.

The Daigas Group will continue to contribute to the sustainable development of society by reducing environmental loads through our business and engaging in environmental conservation activities.
