

**Osaka Gas establishes new electricity service menus, With Plans,
to help customers lead more enjoyable and active lives,
and starts accepting new customers for With radiko Plan**

September 19, 2019
Osaka Gas Co., Ltd.

Osaka Gas Co., Ltd. (President: Takehiro Honjo; hereinafter, "Osaka Gas") will establish a new series of electricity service plans, With Plans, in addition to its lineup of high-value electricity service menus, including Base Plans and Style Plans. The new plans, established in collaboration with various companies and organizations, are intended to help customers lead enjoyable and active lives according to their hobbies and preferences. Osaka Gas will start accepting new customers on October 1 for the first of the series, "With radiko Plan," which offers great value by providing free access to "radiko premium*¹," a paid internet radio service.

Regardless of electricity consumption, With radiko Plan is less expensive for everybody, compared with the total of electricity charge under the meter-rate lighting service A of Kansai Electric Power Co., Inc. (hereinafter, "KEPCO") and the radiko premium service annual fee. A typical household (Osaka Gas model case) will likely enjoy an annual saving of about 5,600 yen.*² In addition, the plan users will have many privileges such as the right to enter a lottery for exclusive events for popular radio programs.

We will continue to diversify our service menus through efforts including expanding our With Plan lineup in alliance with a wide variety of companies and organizations. In addition, through the provision of high-quality, safe and secure service to enable safe use of energy, and a service menu that is helpful for each customer's life and business, we will aim to be a new era energy marketer that will be continuously chosen by customers.

*1 "radiko" is an internet radio-streaming service that lets users listen to radio programs using their PC or mobile phone. A radiko premium member, who pays 350 yen (tax excluded) a month, will be able to listen to radio stations across the country.

*2 Calculation conditions: The service rate is calculated based on the tariff as at October 2019 for both KEPCO and Osaka Gas. Fuel cost adjustment amount and consumption tax are included. The levy for promotion of renewable energy power generation is not included. The calculation is based on the Osaka Gas model case (four family members, monthly consumption 370 kWh, and annual consumption 4,440 kWh).

<With radiko Plan Electricity Charge>

Division		Unit	Unit price (Tax included)
Minimum charge (up to the first 15 kWh)		Yen/contract	660.00 yen
Meter rate charge	more than 15kWh, up to 120kWh	Yen/kWh	20.31 yen
	more than 120kWh, up to 350kWh	Yen/kWh	24.85 yen
	above 350kWh	Yen/kWh	28.85 yen

[Application Range]

- Shall be applied to the demands for lights and small appliances that meet both the conditions shown below.

① The maximum demand is less than 6 kVA.

② When a contract for motive power is concluded concurrently for the same demand location, the total of the maximum demand and contract demand (with 1 kVA being regarded as 1 kW) is less than 50 kW.
