

Osaka Gas issues the Daigas Group Integrated Report 2021 and launches the Daigas Group Sustainability website

October 21, 2021
Osaka Gas Co., Ltd.

Osaka Gas Co., Ltd. (Osaka Gas) announced the issue of the Daigas Group Integrated Report 2021 and the launch of the Daigas Group Sustainability website, which provides the information of the Daigas Group's sustainability activities and ESG data for the fiscal year ended in March 2021.

Osaka Gas issued the Daigas Group Integrated Report 2021 (Integrated Report) to explain to its stakeholders including shareholders and other investors how the Daigas Group (Group) aims to create value for customers, society, shareholders, and employees as a corporate group that powers continuous advancement of customers' lives and businesses. The Integrated Report has been issued in place of the Group's Annual Report and CSR Report.

The Integrated Report also explains how the Group strives to reach its goals and targets set in the Medium-Term Management Plan 2023: Creating Value for a Sustainable Future (Plan 2023) announced in March 2021. The goals and targets were set by re-identifying materiality¹ for the enhancement of the environmental, social, and governance (ESG) management of the Group. Under the Plan 2023, the Group aims to achieve growth through co-creation of value with stakeholders to solve issues in building a sustainable future.

The Integrated Report was prepared in line with the International Integrated Reporting Framework, which was published by the International Integrated Reporting Council, in providing enhanced disclosure of financial and non-financial information as part of the value creating process of the Group.

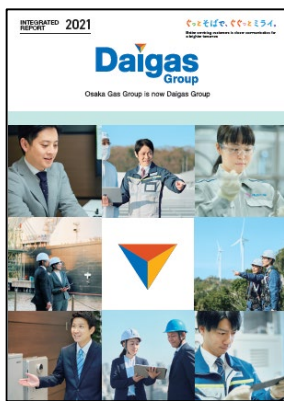

The outline of the Daigas Group Integrated Report 2021:
118 pages in A4 format including items as follows

- Getting to Know the Daigas Group
 - Our Commitment
 - History of Co-creation of Value
- Daigas Group's Co-creation of Value
 - Message from the President
 - Value Creation Process
 - Daigas Group's Businesses and Capitals with Strengths
 - Materiality Identification Process
 - Long-Term Management Vision 2030 and Medium-Term Management Plan 2023
 - Co-create Value for a Sustainable Future (Achieving a Low Carbon / Carbon Neutral Society, Climate Change Initiatives, Establishing Lifestyles and Businesses Adjusted to the New Normal, Enhancing Resilience of Customers and Society)
 - Evolve Our Corporate Group (Enhancing Business Portfolio Management, Promoting Business Transformation with DX, Maximizing Value for Each Employee)
- Business Report
- ESG Highlights
- Corporate Governance
 - Messages from Outside Directors

The Daigas Group Sustainability website² (Sustainability website) has been launched as a renewed version of the Group's CSR website to provide all stakeholders with the information of the Group's initiatives for sustainability.

The Sustainability website follows key international guidelines for sustainability reports, such as the GRI Sustainability Reporting Standards. The Sustainability website provides the overall picture of the Group's initiatives for sustainability, reporting the annual progress and management updates on the materiality initiatives and also reporting the Group's other activities.

The issue of the Integrated Report and the launch of the Sustainability website are part of the Group's efforts to enhance its transparency and reporting on its business activities, through which the Group aims to contribute to achieving a sustainable economy and solving social issues with customers, society, shareholders, and employees.

The Daigas Group Integrated Report 2021

The Daigas Group Sustainability website

The Integrated Report is available on the Group's Investor Relations website (IR website <https://www.osakagas.co.jp/en/ir/>). The IR website and the Sustainability website provide the update on financial and non-financial information as well as timely topics.

¹Materiality is identified from the perspectives of the impact on society and the environment and the future financial impact on the Group.

²The English version of the website is scheduled to be launched around the middle of November: the Daigas Group Sustainability website (<https://www.daigasgroup.com/en/sustainability/>).
