

**Review of the Gas Building Preservation Review Committee
– Basic Direction of Inheritance and Utilization of the Historical Value of Gas
Building –**

June 15, 2022

Osaka Gas Co., Ltd.

Osaka Gas Urban Development Co., Ltd.

As announced on April 26, 2022*, Osaka Gas Co., Ltd. (President: Masataka Fujiwara) and Osaka Gas Urban Development Co., Ltd. (President: Yasuhiro Tomoda) are considering the development of a complex on Group-owned land and the renovation of the Osaka Gas Building (hereinafter “Gas Building”).

* Refer to “Commencement of Consideration: Development of a Complex on the West Side of the Osaka Gas Building and Renovation of the Osaka Gas Building” announced on April 26, 2022.

The Gas Building is highly evaluated for its historical value, with the South Building (completed in 1933) designated as a registered tangible cultural property by the national government. When considering renovations, the Gas Building Preservation Review Committee was established with the succession of the historical value in mind, and opinions from academic experts were heard to determine how the Gas Building should be preserved and utilized in the future.

Now we are pleased to inform you that the basic direction has been settled by this committee. Based on this direction, we will proceed with specific studies in the future.

<Basic direction>

- For the South Building and North Building, both of which have high historical value, an integrated exterior structure and an interior that retains the atmosphere at the time of completion are basically preserved.
- In order to make the Gas Building accessible to more citizens, the company will change its current use from an in-house building to a busy facility and rental offices.
