

**Daigas Gas and Power Solution was awarded FEED and technical consulting service contract for  
CPC's Zhouji LNG receiving terminal project in Taiwan**

June 23, 2023

Osaka Gas Co., Ltd.

Daigas Gas and Power Solution Co., Ltd.

Daigas Gas and Power Solution Co., Ltd. (DGPS), 100% subsidiary of Osaka Gas Co., Ltd. (OG), has been awarded Front End Engineering & Design (FEED) and technical consulting service for the construction project of Zhouji LNG Receiving Terminal owned and operated by CPC Corporation, Taiwan (CPC).

This project is related to the construction project of CPC's fourth LNG receiving terminal to be newly constructed in Kaohsiung Port area. It includes building 4 LNG storage tanks (each with 180,000 kl storage capacity), regasification facilities and receiving facilities for LNG tankers. After the completion of this project scheduled in 2029, LNG handling capacity of this LNG Receiving Terminal finally will be 6 million ton per annum. <sup>(\*)1</sup>

DGPS's first business experience with CPC dates back to 1990 when Osaka Gas Engineering Co., Ltd. (OGE, a predecessor company of DGPS), provided technical support for the commissioning of CPC's Yung-An LNG Receiving Terminal. Since then, OGE/DGPS has established close business relationship with CPC through continuous involvement in CPC's LNG receiving terminals including the ongoing technical consulting service for the construction of CPC's third LNG receiving terminal in Guantang, Taoyuan City<sup>(\*)2</sup>, and the one in Taichung(Phase-4 expansion)<sup>(\*)3</sup> which was ordered last year. DGPS believes that Daigas Group's technical capabilities for designing, construction and operation of LNG receiving terminal and its own relentless efforts and contributions in the preceding projects were highly evaluated by CPC when awarding DGPS the FEED and technical consulting service contract for this Project. DGPS is committed to keep providing a high level of technical services to CPC for the successful completion of the Zhouji LNG Receiving Terminal Project.

Daigas Group including DGPS is going to expand its overseas energy business from upstream to downstream by fully utilizing its experiences in and out of Japan and its existing overseas business platforms.
