

Notice Regarding the Discontinuation of New Applications for the Standard Gas Rate Plan, Launch of the Standard Gas Rate S Plan, and Revisions to Certain Gas Rate Plans

April 9, 2026
Osaka Gas Co., Ltd.

Osaka Gas Co., Ltd. (Representative Director and President: Masataka Fujiwara; hereinafter the “Company”) will cease accepting new applications for its standard gas tariff plan, the “Standard Rate” plan, effective as of September 30, 2026. Accordingly, the Company will launch the “Standard Rate S” plan, which offers higher basic charges but lower usage-based unit rates than the current “Standard Rate” plan, effective October 1, 2026. In addition, the Company will revise the unit rates of certain Gas-Toku plans.

Please note that customers currently on the “Standard Rate” plan, as well as those who sign up for the plan by September 30, 2026, will be able to continue using the service under the existing terms and conditions from October 2026 onward.

To date, the Company has promoted operational efficiency through initiatives such as the use of IoT and external resources and, together with its partner companies, has worked to ensure safety and enhance services in line with customer needs.

However, the business environment has changed in recent years due to rising prices, higher labor costs, and labor shortages, while the demand structure has also changed in response to retail liberalization. Against this backdrop, the Company has been implementing phased revisions to its gas rates for industrial and commercial customers. In order to maintain safety standards and further enhance convenience, the Company will review its tariff structure, primarily for residential customers.

The Company will continue to improve the efficiency of its business operations and appreciates your understanding.

1. Launch of “Standard Rate S”

(1) Rate details

The plan features a rate structure with higher basic charges and lower usage-based unit rates than the conventional “Standard Rate” plan.

(2) Comparison with the conventional “Standard Rate” plan (general charge)

For a standard household*, the monthly difference is 35 yen (including tax).

| Standard Rate | Standard Rate S | Difference |
|---------------|-----------------|------------|
| 6,298 yen | 6,333 yen | +35 yen |

The above figures represent the monthly charges, including the gas resource cost adjustment and consumption tax applicable to the May 2026 meter reading.

* Calculated based on the average usage of 30 m³/month by household customers. Actual charges may vary from month to month, depending on seasonal factors and usage conditions.

*The gas usage for a “standard household” is based on the average monthly usage of the Company’s household customers over the five-year period from April 2017 to March 2022.

- (3) Start of application acceptance
New applications will be accepted from October 1, 2026.

2. Rate Revisions for Certain “Gas-Toku Plans”

(1) Details of rate revisions

For the relevant plans, basic charges will be raised and usage-based unit rates will be lowered.

(2) Relevant gas rate plans

| Relevant rate plan | |
|-------------------------|--|
| Accepting applications | Floor Heating and Discount (Standard Plan / Eco-JOZU Plan) |
| | House Air Conditioning (Standard Plan / Eco-JOZU Plan) |
| Closed for applications | My Home Power Generation* |
| | Floor Heating (Standard Plan / Eco-JOZU Plan)* |
| | Eco-JOZU* |

*The acceptance of new applications for My Home Power Generation Plan and the Floor Heating Plan was discontinued as of the end of March 2022.

*Acceptance of new applications for Eco-JOZU Plan was discontinued as of the end of May 2019.

(3) Amount of impact on customers (including tax)

| Rate plan | Model usage | Before revision (Monthly) | After revision (Monthly) | Difference (Monthly) |
|--------------------------|----------------------------|---------------------------|--------------------------|----------------------|
| Warm Home Discount | 813 m ³ /year | 10,320 yen | 10,316 yen | -4 yen |
| House Air-Conditioning | 1,016 m ³ /year | 10,926 yen | 10,940 yen | +14 yen |
| My Home Power Generation | 1,630 m ³ /year | 15,494 yen | 15,460 yen | -34 yen |
| Floor Heating | 813 m ³ /year | 9,305 yen | 9,326 yen | +21 yen |
| Eco-JOZU | 680 m ³ /year | 10,384 yen | 10,504 yen | +120 yen |

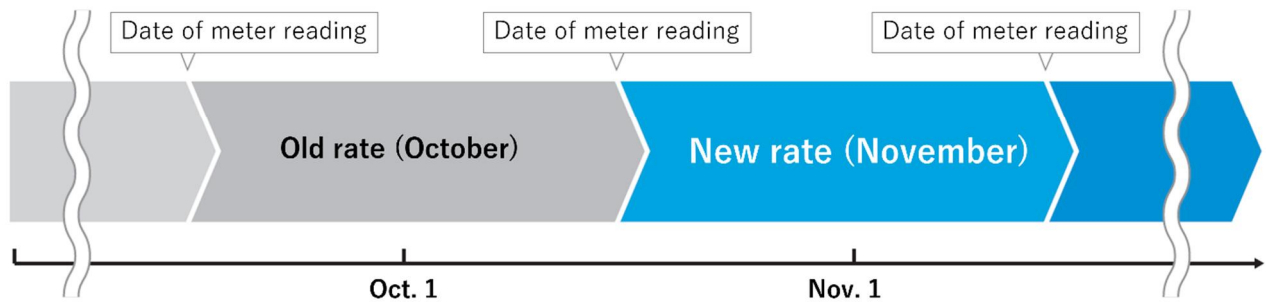

The above prices are calculated based on the monthly unit rates, including the gas resource cost adjustment and consumption tax applicable to the May 2026 meter reading.

*The above figures are examples of increases/decreases resulting from the rate revision, based on model usage. If actual gas usage is lower than the model usage, charges after the revision may be higher than before the revision, or the increase in charges may be greater.

(4) Timing of application to gas bills

The individual terms and conditions will be revised on October 1, 2026, and the revised rates will apply to gas bills from the November 2026 meter reading onward.

Application period concept image

*For customers who start using gas on or after October 1, 2026, the revised rates will apply to gas bills for the October 2026 meter reading if the meter reading takes place in that month.

3. Revision of Individual Gas Terms and Conditions

The Company will revise its individual terms and conditions for gas services effective October 1, 2026, to reflect revisions to application conditions and settlement provisions following the introduction of the “Standard Rate S” plan.

Please refer below for the revised individual terms and conditions for gas services.
